

Aleksandra Mitic (SR) is a Serbian artist and textile designer living in Linz, Austria. She obtained her diploma in Fine Arts with an emphasis in textiles from the School of Design, and her bachelor's degree from the Universität für künstlerische und industrielle Gestaltung, where she currently attends the Interface Culture Master program.

Inspired by the world around her, nature in its most playful forms, principally using traditional patterns and motifs, in both conventional and contemporary contexts, Aleksandra's work is driven by the desire to leave something beautiful behind with every step she takes.

She has participated as a designer in international fairs such as Première Vision Paris, and in the exhibition of the NEW DESIGNERS LONDON, in London. At the same time, Aleksandra Mitic designs and creates textile works of art and interactive installations, while using different media and materials.
